In re Application of Winkelman, *et al.*
Application No. 09/593,973
Amendment and Response to First Office Action
Page 2

AMENDMENTS TO THE SPECIFICATION

Please amend the specification of the application as follows:

In the heading located on page 4, line 10:

DETAILED ~~DESCREPTION~~ <u>DESCRIPTION</u> OF AN EXEMPLARY EMBODIMENT

In the paragraph beginning on page 5, line 20:

An exemplary operating environment 100 for implementing the invention includes a conventional personal computer system, including a processing unit 21, a system memory 22, and a system bus 23 that couples the system memory 22 to the processing unit 21. The system memory 22 includes read only memory (ROM) 24 and random access memory (RAM) 25. A basic input/output system 26 (BIOS), containing the basic routines that help to transfer information between elements within the personal computer system 20, such as during start-up, is stored in ROM ~~124~~ <u>24</u>.

In the paragraph beginning on page 9, line 3:

Referring back to Fig. 2, method 200 continues to step 215 where the system is provided with a recipe text file 39 containing formatting descriptions. The recipe text file 39 provided to the system may be selected form a plurality of such files stored on the hard disk 32 and may be specified by information contained in the input data text file 28. For example, the input data text file 38 as shown in Fig. 3 may contain a particular name/value pair 370 designating a particular recipe text file named ~~4X6Lable~~ <u>4X6Label</u>. The formatting description contained in the recipe text file 39 may specify the label size, text font and size, and the location of icons such as logos or bar codes. In addition, if a particular destination such as a foreign country is specified in the input data, the formatting will reflect the customs or requirements of the destination.
